"Jessie is easily one of the very best developers I've met, let alone worked with. He has acquired a remarkable amount of knowledge regarding software development as a whole but his .NET-expertise is especially impressive."

- Henrik Björk, Senior Software Engineer / System Architect at Tobii Technology

"Jessie is always at the forefront with new technology and has a great ability to implement these within the organization. He is also adept at grasping specifications and turn those into requirements for other developers."

- Carl Liwerstrohle, CEO at SpeedUp
